OKAFOR, IFEANYI WILSON

Cloud Security Architect | Infrastructure Architect | DevSecOps Engineer
Van Nuys, CA 91405| (818) 800-5736|Ifeanyi_wilson@yahoo.com| US NAVY Veteran.

SUMMARY

I am an architect who designs, secures, automates, and operates cloud platforms at scale. A Senior Cloud Security and Infrastructure Architect with 15+ years of experience designing, securing, and optimizing enterprise cloud platforms across AWS environments. Expertise spans cloud architecture, DevOps, DevSecOps, Automation, application modernization, and large-scale infrastructure transformation. Proven track record delivering secure, highly available, and scalable cloud solutions supporting development, disaster recovery, and production workloads. Skilled in Cloud Security, IAM, vulnerability remediation, TLS/SSL implementation, infrastructure automation, observability, and production incident management. Adept at bridging enterprise architecture, cybersecurity, application engineering, and operations to drive business outcomes, improve resilience, and reduce operational risk. Certified AWS Solutions Architect, CISM, CEH, and PMP.

CORE COMPETENCIES

Cloud Security & DevSecOps • AWS Security Architecture • IAM & Least Privilege • Cloud Infrastructure • Infrastructure-as-Code • CI/CD Automation • Serverless Architecture • Cloud Networking • TLS/SSL • Vulnerability Remediation • Security Automation • Observability • Incident & Root-Cause Analysis • Application Modernization • Enterprise Architecture Governance (Compliance and Configuration)

PROFESSIONAL EXPERIENCE

United Airlines, Chicago, IL.
DevOps Engineer|SRE|Cloud Infrastructure Engineer **03/2022 - Present**

- Partnered with IT architecture team and management to design, implement, maintain, and create strategies, roadmaps, solutions, infrastructure standards, and processes, in application integration & architecture modernization.
- Achieved annual cloud cost reductions exceeding $512K through infrastructure rightsizing, capacity optimization, and automated resource governance across multiple enterprise applications.
- Implemented and maintained monitoring and alerting systems, that reduces Mean Time to Resolution (MTTR) by 40% and improved system availability by 25%
- Led cloud modernization and automation initiatives resulting in reduced infrastructure costs, improved system reliability, and accelerated application delivery across enterprise-scale environments.
- Designed and implemented a fully automated CI/CD pipeline, reducing deployments time by 50%, while increasing deployment frequency by 95%.
- Provide infrastructure architecture and DevOps leadership towards Modernization, Optimization and Migration efforts across multiple critical applications.
- Lead root-cause analysis for complex AWS failures involving IAM, AWS Compute Systems, Serverless Systems, Containers, TLS/SSL, Networking, Event Bridge, API Gateway, and database connectivity, etc.
- Developed and automated Disaster Recovery Systems for 32 applications, with 98% reliability in traffic transfer.
- Provision and automate enterprise infrastructure using CloudFormation, Terraform and other IAC platforms, resulting in 42% reduction in infrastructure cost and 20% increase in system reliability.
- Support cloud-security initiatives involving IAM, TLS/SSL, HTTPS security policies, Wiz, Veracode, Invicti, and DevSecOps controls.
- Monitor and evaluate logs, metrics and traces scaling performance statistics of cloud hosted environments.
- Develop application performance management to measure and leverage performance data.
- Designed and Implement observability hub, onboarding CloudWatch, Datadog, Dynatrace, and centralized application/container logging.

ESPN, Bristol, CT.
AWS Solutions Architect - Consultant **10/2019 – 03/2022**

- Designed, managed, and supervised several cloud production projects, to support the strategic objectives of Enterprise. Designed and adjusted global AWS infrastructure, including nodes in 12 regions and 39 sub-regions.
- Partner with IT architecture team and management to design, implement, maintain, and create strategies, roadmaps, solutions, infrastructure standards, and processes.
- Automated and deployed N-tier architecture with full stack, in various operating systems.
- Created, Managed, and monitored clusters of 87 EC2 instances, behind ALBs within multiple AZs.
- Provided assistance and expertise to management on improvements to company productivity, systems performance, high availability, monitoring, and operational costs.
- Researched, analyzed, evaluated, and provided recommendations to management on Next-Gen technology direction including but not limited to cloud services, Network, Compute, Storage, and Endpoints.
- Check health and performance of containers running inside nodes of EKS cluster using Elasticsearch cluster.
- Created and configured elastic load balancers and auto scaling groups to distribute the traffic and to have a cost efficient, fault tolerant and highly available environment.
- Creating and using REST APIs for various needs in target applications, including calling Step functions.
- Responsible for Continuous Integration (CI) and Continuous Delivery (CD) process implementation-using Jenkins; along with Python and Shell scripts to automate routine jobs.
- Managed the monitoring and alarms of production and dev. servers using CloudWatch and Datadog
- Architected highly available data platforms leveraging Amazon RDS to support enterprise-scale application modernization initiatives.
- Created Transaction Processor State Machines, utilizing LAMBDA to integrate STEP FUNCTIONS.

Northrop Grumman, Los Angeles, CA
AWS Infrastructure Architect **07/2016 – 10/2019**

- Lead architecture initiatives from inception to completion. Assist management and engineering staff in the evaluation, analysis, architecture, design, and implementation of enterprise infrastructure and application programs and projects.
- Migrated enterprise applications from on-premises data centers to AWS.
- Configured AWS Identity and Access Management (IAM) Groups and Users for improved login authentication. Also handled federated identity access using IAM to enable access to our AWS account.
- Led enterprise infrastructure architecture initiatives from requirements through design, implementation, and production delivery.
- Migrated enterprise applications from on-premises data centers to AWS.
- Implemented AWS IAM authentication, federated access, DNS, SSL certificates, and secure application connectivity across Dev, QA, and Production.
- Automated infrastructure and application deployment processes using AWS CLI, Bash, and Python

Microsoft Corporation, Redmond WA.
Business Analyst **03/2011 – 07/2016**

- Worked independently with users to define concepts and clarify Functional and Non-Functional requirements daily.
- Facilitated the Joint Application Development (JAD) sessions with project stakeholders to capture business rules, processes, and system requirements for specific Application System.
- Led requirements analysis, architecture planning, process engineering, and technology initiatives for enterprise applications. Serving as SME for the Software Change Request Process (SCR) to effectively manage all change requests to the application.
- Facilitated JAD sessions and collaborated with business stakeholders, developers, architects, and subject-matter experts to define functional and non-functional requirements.
- Developed business requirements, technical requirements, test plans, and test cases for enterprise applications.
- Supported migration planning from legacy platforms to J2EE-based architecture and managed software change requests and configuration management. Developed and documented business requirements, technical requirements, test plans, and test cases for the Image Processing Applications (IPS).

EDUCATION

- Master of Science, Cybersecurity — American Public University | 2021
- Master of Business Administration — University of Politechnica, Bucharest | 2012
- Bachelor of Science, Computer Science — Federal University of Technology, Owerri | 2009
- Certificate, Business Analysis — Jrock Institute of Technology | 2014

CERTIFICATIONS

- AWS Certified Solution Architect – Associate (AWS-SA)
- Certified Information Security Manager (CISM)
- Project Management Professional (PMP)
- Certified Ethical Hacker (CEH)

TECHNICAL SKILLS

Cloud Architecture & Infrastructure:
AWS, Multi-Account AWS Architecture, Landing Zones, VPC Design, Route 53, Direct Connect, Hybrid Cloud, High Availability, Disaster Recovery, Infrastructure Modernization

Cloud Security & Governance:
AWS IAM, Least Privilege, Federated Identity, Trust Policies, AWS WAF, AWS Shield, ACM, TLS/SSL, Security Groups, VPC Endpoints, Amazon Guard Duty, Vulnerability Management, Wiz, Veracode, Invicti

DevOps & Infrastructure as Code:
Terraform, CloudFormation, AWS CLI, GitHub, Harness, Jenkins, TeamCity, CI/CD, Infrastructure as Code (IaC), YAML, JSON, Bash, Python

Containers & Platform Engineering:
Kubernetes (EKS), Docker, ECS, Fargate, ECR, Microservices, Serverless Architecture, Application Modernization

Observability & Reliability Engineering:
CloudWatch, Datadog, Dynatrace, Elasticsearch, Monitoring, Logging, Tracing, Incident Response, Root Cause Analysis, SRE Practices

Databases:
Amazon RDS, DynamoDB, PostgreSQL, MySQL, Oracle, SQL Server

Methodologies:
Cloud Architecture, Enterprise Architecture, DevOps, DevSecOps, Agile, SDLC, Waterfall, Application Modernization
